

If you're currently using a paper or homegrown time-recording system to put time into Abra Payroll, prepare to smile. Because you're about to be delighted with the efficiency and compatibility of Abra TimeSheet Professional.

Now, you can place electronic time sheets on each employee's desktop and slash the time required in coordinating with payroll. Just put Abra TimeSheet Professional to work with Abra Payroll. You'll be reducing payroll administration and mistakes. What's more, you'll be enabling managers to approve time sheets online and put an end to any mistake before it reaches payroll.

Web-based interface for all employees, everywhere

Whether your employees are at their desks or around the globe, Abra TimeSheet Professional's multiple user interfaces make time sheets available to employees via the Web, Palm® Pilot and laptop. So lost time—or delayed time—is a thing of the past.

Set-up is a breeze

If you're using Abra Payroll, existing information about employees is already on hand—there's no need for repetitive work. It can now be exported seamlessly into Abra TimeSheet Professional.

Complex pay structures are no problem

With Abra TimeSheet Professional's flexible pay rules, you designate what constitutes regular time and overtime. Each pay category is mapped to existing Abra Payroll earnings categories, making it possible to handle even the most complex pay structures.

(over, please...)

Maximize the value of
Abra Payroll with this
new time-entry system.

Seamlessly drive
payroll hours straight
to Abra Payroll via
the Web.

Eliminate the wasted
time and costly errors of
double entry.

Review and analyze time
spent on projects and
resource allocations.

Now you can completely eliminate the mistakes, frustration and time wasted that result from dual entries. No longer will your employees fill out time sheets only to have another administrator (possibly you) re-enter this information into Abra. Instead, the hours your employees enter into TimeSheet Professional will flow seamlessly from an easy-to-use interface, directly into Abra Payroll—where you can view information and update it, if you wish.

More benefits of Abra TimeSheet Professional...

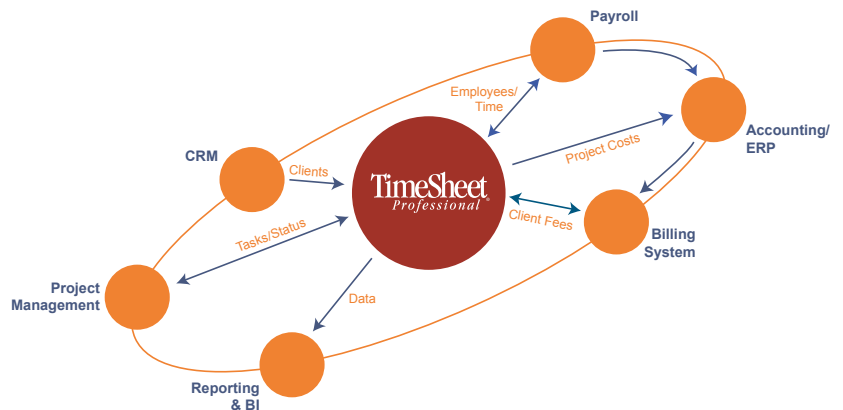

Manager Insight

Abra TimeSheet Professional provides the information needed to make the right business decisions. With many reports available, Abra TimeSheet Professional can give instant access to pay calculations, time for each employee, employee payroll exceptions and project profitability.

Abra TimeSheet Professional also gives you the ability to evaluate personnel efficiency, allocations and internal chargebacks. And for project-oriented workgroups and organizations, Abra TimeSheet Professional gives you an instant look at project cost, profitability and status.

Simplify Your Organization

Are you entering time into multiple systems to help support payroll, accounting, project management and billing functions? Abra TimeSheet Professional can easily interface with all your current systems, providing a single point of entry—ensuring the delivery of accurate and consistent data.
